PROCESS FOR PREPARING CERTAIN PYRROLOTRIAZINE <u>COMPOUNDS</u>

5 <u>Abstract of the Invention</u>

The present invention relates to a process for preparing certain pyrrolotriazine compounds of the formula

$$R^3Y$$

and pharmaceutically acceptable salts thereof.

The formula I compounds inhibit the tyrosine kinase activity of growth factor receptors such as VEGFR-2 and FGFR-1, thereby making them useful as anti-cancer agents. The formula I compounds are also useful for the treatment of other diseases associated with signal transduction pathways operating through growth factor receptors.
